

ASHVINIKNES SARAVANAPERUMAL

ELECTRICAL ENGINEER | SOFTWARE ENGINEER

An Electrical & Electronics Engineer with 1 year and 10 months of experience in Software Engineering. My focus is on charging and rating systems for telecommunications, EV charging, and IoT. I specialize in Golang, microservices, and integrations like WhatsApp, Payment and AWS S3. Currently, I am pursuing a Master's in Nanoelectronic Systems at TU Dresden.

Skills - [Golang](#) [Docker](#) [Kubernetes](#) [AWS S3](#) [Backend Dev](#) [Payment Integration](#) [DSA](#) [LLD](#) [Power Electronics](#) [Electrical Machines](#)

WORK EXPERIENCE

volytica Diagnostics, Dresden | Working Student | October 2024 – Present | [Volytica](#)

- Developed REST APIs in Java and Kotlin, enhancing the existing product's functionality.
- Conducted performance testing, identified and resolved critical bottlenecks, improving system efficiency.
- Worked with Python to develop a performance framework and analyze test results for optimization.
- Integrated a second data source into the existing application, expanding data availability.

BlueoceanDigital India Private Limited, Coimbatore, Tamil Nadu, India | Software Engineer | July 2023 - September 2024 | [Blueocean](#)

- Integrated payment RestAPI's with Stripe and Razorpay.
- Developed APIs for AWS S3 Bucket integration, improving document management by 90%.
- Achieved rapid PDF invoice generation in 30 milliseconds.
- Streamlined order management processes and implemented payment webhook for faster subscription activation.
- Created tools for efficient client information management.
- Established Payment-Service Server for improved payment logic and integration.
- Developed Secrets Manager application for enhanced security.
- Optimized the overall application size for better performance.

RESEARCH PAPER PUBLICATION

The publication of the research article, "[Internet of Things based Real Time Energy Monitoring System in IEEE Xplore](#)" represents a significant achievement associated with Sri Ramakrishna Engineering College. This paper showcases the innovative solution to combat electricity theft through IoT technology.

VIRTUAL INTERNSHIP

TVS Training and Services Limited (TVSTS) | Motors and Drives in Electric Vehicle | December 2021 - January 2022 | [TVSTS](#)

Explored diverse EV motor types, power electronics, and current trends through virtual simulations and interactive modules. Acquired skills in motor design, energy efficiency, and optimization.

 [Presented about Motors](#) covering construction, applications, and usage stats in EVs.

BlueoceanDigital India Private Limited,
Coimbatore, Tamil Nadu, India | Software
Engineer Internship | December 2022 - June 2023
| [Blueocean](#) |

- Implemented IUT session management and rate consumption to enhance overall efficacy.
- Utilized Figma for UI Design, ensuring visually appealing and user-friendly station layouts.
- Developed REST-APIs compliant with OCPP standards.
- Implemented the Behavior-Driven Development (BDD) features for detailed testing and validation.
- Developed a dockerized server solution hosted in the kubernetes environment for meta platform integration.
- Contributed to the development of a versatile core charging and subscription engine serving telecommunications, EV charging, and IoT industries.

Certification  Software Engineer Internship Certificate

EDUCATION

Sri Ramakrishna Engineering College
Coimbatore, Tamil Nadu , India
Bachelor of Engineering (B.E.) in Electrical and
Electronics Engineering | JULY 2019 - MAY 2023 |

- Completed an eight-semester program with comprehensive  UG Curriculum .
- Engaged in laboratory work, projects, and self-directed study.
- Actively participated in extracurricular activities and held leadership roles as Student Placement Coordinator and Student Representative.
- Graduated with a first-class distinction, achieving an overall score **8.81 CGPA** .

Mercy Matriculation Higher Secondary School
Tirupur ,Tamil Nadu , India
High School (HSC) | 12th Grade | June 2018 -
March 2019 |

- Majored in Computer Science and Mathematics.
- Achieved an overall percentage of **77.17** .

AWARD

 Award for being Representative of EE Community ,
Served as the Department Representative, improving communication and coordinating student placements.

Certification  Motors and Drives in Electric Vehicle

PERSONAL ENDEAVORS

Personal Portfolio Website

Developed a personal website using HTML, CSS, and JavaScript, featuring the interactive elements and animations which showcases projects, skills, and achievements. Available online via [Portfolio](#).

Kubernetes Secret Vault

Created a tool using Go for managing secrets and namespaces via REST APIs, showcasing commitment to backend development expertise. Code available on [Kubernetes-secret-vault](#).

Stripe Payment POC

Developed a Stripe Payment Gateway integration POC using Go, featuring a backend server with APIs for order handling and an user interface for processing transactions. Code available on [stripe-payment-poc](#)

ACADEMIC PROJECTS

 IoT based Real Time Energy Monitoring System

1st August 2022 - 28th May 2023

Designed to detect electricity theft using IoT and smart meters, this system facilitates real-time energy analysis and alerts officials of irregularities.

 Astute Water System

7th June 2021 - 21st May 2022

Ideal for upgrading existing rooftop water overflow systems with a cost-effective and efficient solution.

 Temperature Controlled DC Fan

14th September 2020 - 10th April 2021

Developed an automated fan speed controller to adjust the electric fan's speed based on ambient temperature, applicable to PCs, air conditioners, and furnaces.
